This is repeated three daysthe cheese is then taken from the press, & placed into a dry cheese loft, and turned every day for a fortnight; then every other day until sold. Good thick cheese of forty or fifty pounds' weight, and one year and a hulf old, have generally brought £3 to £3 10s. sterling per cwt.; older cheese has generally brought £4.

English market. I received a letter from a rela-before purchasing elsewhere. tion in England the other day, in which he says Probate Administrator's & Guardian's it was selling there at middling prices.

The quantity of cheese per cow depends on the nature of the soil; it is not always the richest soil that makes the most dairy goods. I have known the same dairy man make 5 cwt of cheese per cow on one farm, and on another a few miles and allowance, were presented at and previous to the last distant could only average 4 cwt.

an easy examination, is found to be deficient in organic mattes, and the advice may be—try the plowing in the green crop, another may contain

Jacob Parkinson, and James Leech, Executors of the last will and Testament of George Fisher, dec'd.

Jacob Parkinson, and James Leech, Executors of the WESTERN EXCHAI third may contain sulphate of iron or alumma—
dian, deep plow, lime or mark, and summer fallow such land and you take the shortest road to
wards a cure. Again, one may ask, why does
lime not benefit my land? An easy analysis wil
reply, because it abounds in lime already, and the last will and Testa
must have a season of rest from liming, or because
it is poor in organic matter, and requires more
liberal supplies of manure; or if neither of these
fis the case, because your land requires draining.
So the subsoil may be yellow and noxious when
brought to the surface, or it may kill the roots of
plants when they descend to it. Then a simple
examination may prescribe draining and subsoiling, that the noxious matter may be washed out
